TIME TO SHINE!

BESPOKE JOINERY BY CRAFTSMEN FOR THE 21ST CENTURY

No change of direction, no compromise of service or quality, just a tidy up for the 21st Century.

But we do aim to take our brand out there and let our customers know, both old and new, what we do and why we're so good at it.

As such we've stepped outside of the Hall Group branding style and come up with one which we think suits our ethos and reflects what we're all about.

To clarify what we do and why and how we do it, we've placed our work under three new banners: Manufacturing, Heritage and Grand Designs.

FOR THE 21ST CENTURY

MANUFACTURING

Throughout all of our work we have highly specialised and experienced staff and we will always achieve the best bespoke joinery available, creating just what you, our customer needs.

HERITAGE

We benefit from having a highly skilled workforce with the experience to supply any refurbishment or restoration joinery product to period homes or buildings. We will use like for like materials with established joinery methods to create a wide range of traditional windows, doors & staircases with intricate, hand carved finishes to suit the period style.

GRAND DESIGNS

Whatever the project, we pride ourselves on supplying joinery of distinction, however complicated, to the highest standard from the sourcing of quality timbers from FSC® certified suppliers to the careful delivery to your site.

A LOT HAS HAPPENED SINCE BATTY STARTED IN 1919...

...with the introduction of new techniques and production methods as well as being environmentally conscious at every stage of design, production and finishing.

One thing has remained constant - a focus on our customers' needs and providing them with a top quality, professional and personal service at a fair price.

We look to the future with optimism and renewed vigour under our new banner, where we will continue to reinforce our working relationships and forge lasting new ones.
